

Suitable for printing

Transaction and Book

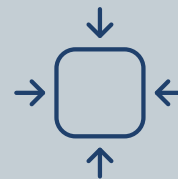

High-Speed, Cold-and-Flat Inkjet Technology

RISO's quick-drying oil-based ink is designed to increase productivity. Without the need for heat during printing, RISO inkjet press can print up to 330 ppm A4 duplex. It produces cold and flat output with better color consistency, eliminating paper curling and maximizing uptime. Ideal for transactional and book printing, as it ensures stable and seamless production from printing through post-processing.

Affordable Color Printing with Reliable Consistency

RISO's inkjet technology offers significantly lower color running costs compared to toner-based printers, resulting in decreased overall cost per print. RISO inkjet press bridges the gap between the current fleet, allowing for a variety of color print jobs done in-house and contributing to maximizing profitability.

Small Footprint and Investment

RISO inkjet press boasts a compact footprint and lower investment cost for its incredible output speed, making it a more accessible solution for print service providers. It can fit next to post-processing devices or larger roll-fed presses and handle short runs.

VALEZUS

ComColor

Transactional Printing

Invoices and Statements, Tax Related Documents, Account Updates and Policy Changes, NCR and Envelope

Adaptable Short-run Printing Capability

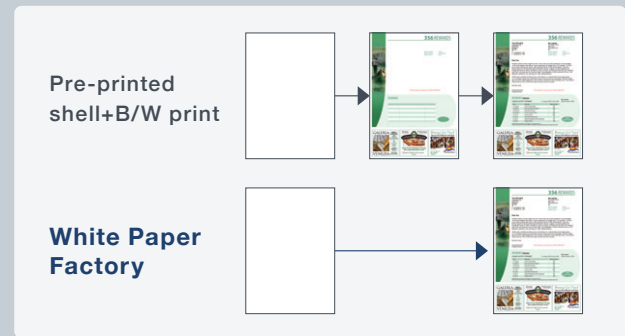

RISO's inkjet presses efficiently handle short runs and reprints of transactional documents. Its cut-sheet design enables quick paper changes, while high productivity and low running costs ensure profitability.

From Envelope Printing to Reliable Insertion

RISO's heatless inkjet technology enables reliable printing of envelopes, including those with windows. It also eliminates heat-related issues like paper curling, allowing seamless integration with post-processing like insertions and enabling efficient, cost-effective production of transactional mail.

White Paper Factory

With RISO inkjet presses, you can produce full-color transactional documents on-demand at low costs, eliminating pre-printed shells and enabling flexibility for customer changes while reducing inventory and waste costs of pre-printed shells.

Book Printing

Textbooks, Examinations, Reports, Manuals, Guides, Diaries

Short-run / On-demand Book Printing

For short runs of 1-500 books or more, on-demand printing is more efficient with RISO inkjet presses than offset or inkjet roll-fed presses. The VALEZUS T2200 can print SRA3 duplex at 84 sheets per minute, contributing to faster turnaround times and making it a cost-effective solution for short-run book printing.

Affordable Color Book Printing

RISO inkjet press's low color print cost compared to toner printers makes on-demand color book printing more affordable. Printing companies can now offer color book printing at an attractive price point, adding value for their customers while increasing profits.

Seamless Integration and In-line Booklet Making

RISO's high-speed inkjet presses integrate with existing post-press equipment such as binders and trimmers, optimizing on-demand book production workflows and increasing efficiency. In-line booklet-making configurations are also available, further enhancing productivity and labor efficiency.
