VALEZUS T1200

The perfect solution for both short and long run transactional printing, offering the flexibility to meet current and future market requirements

Are you looking for a production printer that combines excellent cost performance with the flexibility to meet the varying job demands that large continuous feed printers find difficult to handle efficiently?
VALEZUS T1200 is the ideal solution to your needs, delivering the incredible high print speed of 165 pages per minute* in color, combined with low investment for installation, space-saving and environmental friendliness.
This compact printer, which supports AFP/IPDS, PS and PDF formats, is designed for easy integration into your current workflow. VALEZUS T1200 creates new business opportunities for you in the diversifying transactional print market.

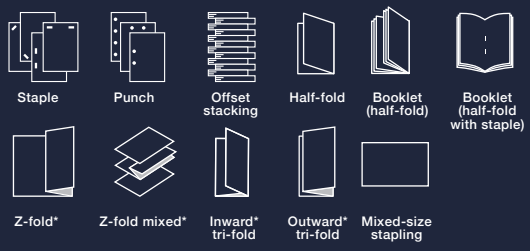
Inline Finishing Configuration

In addition to usual stacking printing.
VALEZUS T1200 can also be used for staple, Booklet (half-fold with staple),punch and inline finishing.



*With folder Unit FG20

High productivity to meet tight deadlines

VALEZUS T1200, a compact production printer achieving one of the very highest productivity figures in its class. Its flexibility offers fast and easy print job changeover, with the benefits of cutsheet output. These advantages allow you to meet even the tightest of deadlines in this demanding market.

VALEZUS T1200

Easy integration for uninterrupted current workflow

TagG αStream controller supports native IPDS workflow, and EFI™ Fiery® controller, used widely across the production printing industry, are available. This helps ensure the VALEZUS T1200 installation is smooth and without change to your current workflow.

Optimise transactional printing with COLD printing technology

Taking advantage of RISO's integrated production of hardware, software, and consumables, we have developed a new high-concentration ink that enables even higher printing density. RISO's proprietary oil-based ink eliminates the need for heaters to dry the ink, enabling us to greatly reduce the overall footprint and energy consumption of our devices. Furthermore, the absence of heat during our print process means the paper won't curl or ripple, and post-print processes run far more smoothly with our output.

Space-saving and maximized productivity

The VALEZUS T1200 is a very compact production printer for its incredible output speed, which means it can be placed, if required, beside a post-print processing device or a larger continuous feed machine to handle reprint applications. The compact-sized printer is designed to ensure that operators are always close to all key areas of the machine, therefore improving work efficiency.

Easy installation and quick return on investment

The VALEZUS T1200 eliminates the need to install ducting for temperature control, heat or fumes extraction and operates on standard type power supply. The intuitive interface makes it quick and easy for you to get it up and running. RISO has made all the various costs normally associated with installing hardware as minimal as possible.
